PARAFOIL

The Ram-Air Parachute was invented by Domina C. Jalbert. This was the most radical departure in sport parachute design since Leonardo da Vinci sketched the original in 1495. So radical, in fact, that the Smithsonian has included a parafoil among its exhibits.

Today's Parafoil is truly the world's most incredible sport canopy, internationally recognized as the premier competition accuracy parachute. The Parafoil's remarkable staility in all conditions makes it a fine all-around choice for the jumper who wants to fly the best.
